and Technology Company for  
the Millwork Industry  
Introduces Our New

## Windows-Based Warehouse Management System

WoodWare's Warehouse Management System utilizes hand-held Radio Frequency (RF) based barcode scanners throughout the warehouse. The use of RF devices provides real-time updates and inquiries to the inventory control module so that products can be tracked throughout the warehouse, literally every time they are "touched" or moved. The Windows-based WoodWare WMS includes the following modules:

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> Receiving             | <input checked="" type="checkbox"/> Put Away                 |
| <input checked="" type="checkbox"/> Item-Unit Move        | <input checked="" type="checkbox"/> Replenishment            |
| <input checked="" type="checkbox"/> Production Completion | <input checked="" type="checkbox"/> Picking                  |
| <input checked="" type="checkbox"/> Shipping              | <input checked="" type="checkbox"/> Physical Inventory       |
| <input checked="" type="checkbox"/> Cycle Counts          | <input checked="" type="checkbox"/> Product Location Inquiry |
| <input checked="" type="checkbox"/> Damage Reporting      | <input checked="" type="checkbox"/> Real-Time Communications |

The system also includes software to Prioritize and Assign Worker Tasks, and it interfaces with the main WoodWare System.

If you pre-hang doors, make millwork products, or mull window units:

WoodWare is the software for you!
